

Position as Lab Manager in Neurorehabilitation at the University Hospital of Geneva

The Division of Neurorehabilitation at the University Hospital of Geneva invites applications for the position of Lab Manager. This role provides a unique opportunity to contribute to cutting-edge research in brain plasticity and neuromodulation, translating innovative therapeutic approaches into clinical practice.

About Us

The research group investigates brain plasticity in patients with acquired brain injury and the effects of new treatment approaches based on neurotechnology. We are an interdisciplinary and highly collaborative research group. The work environment is dynamic, international, and offers a great team spirit.

Your Challenge

As the Lab Manager, you will play a pivotal role in coordinating scientific projects and overseeing patient recruitment for clinical trials. Your active involvement in ongoing studies includes facilitating communication with regulatory bodies.

Your profile

- PhD in neuroscience, psychology, biology, engineering, medicine, or a related field.
- Proven experience in executing and/or managing scientific projects.
- Proficient in neuroscience technologies such as EEG, brain stimulation, or similar.
- Excellent communication skills with fluency in both English and French.

Our offer

- Highly innovative and interdisciplinary work with rich interactions among neuroscientists, engineers, and clinicians.
- Your activity has a visible benefit for patients.

Starting date

01 June 2024 or as agreed upon. The position is open-ended.

Remuneration

Competitive salary in accordance with the scales of the University of Geneva.

Contact and further information

To apply for this position, please submit a letter of interest, a comprehensive CV, and a recommendation letter electronically. The position will remain open until filled.
